

CLOCKY®

WHAT IS IT?

The alarm clock that runs away beeping, to get you out of bed.

Can't wake up? You're not alone. Stats show that 40% of people 'abuse' the snooze. Typical alarm clocks just don't work very well. Ours never lets you oversleep again. If you snooze, Clocky will jump off of your nightstand, and run around beeping, absolutely determined to get you out of bed on time. Clocky's hip, innovative, and charming. Patent 7355928

BENEFITS

Security! Never oversleep again!

COLORS

Almond: CLKYaw
